Marketing Campaign For Coffee County Starts Next Monday

Three or four good well trained, practical men from the farm bureau headquarters in Montgomery will spend next week in this county in the interest of better markets for Coffee County farm products. The campaign sign up will be under the immediate management of the local board of directors consisting of Dr. Braswell, Ab. Moxes, Joe Donaldson, Dr. Sutherland, Jim Martin, J. P. Finley, Pete Talbot and we all will do our best to assist these men in their worthy task.

Begin Now To Pool Orders For Fall Seed.

There are any number of ways that farmers can cooperate for profit, but it requires looking ahead and anticipating your wants. Every cultivated field should be sown this fall to some crop, either oats, rye, or hairy vetch or burr clover or annual yellow melilotus. Some of these seed come high at retail from seedmen, but at three counties in this section are figuring on using a whole car of hairy vetch seed, and I believe the results will show that this is such a promising crop for this county till we can easily make up a solid car for Coffee next fall. This vetch is a legume and grown in the winter time and builds up land just as do peas and velvet beans, and 12 years experience and field observation tell me that it is a good crop for every farmer in the county. Why do we recommend it so highly? Because you can sow it in your cotton middles in October without any extra preparation of the land, and turn it under next spring and practically double your yield of corn on the land. It puts into the soil when a crop is turned under in the spring the equivalent of 500 lbs of nitrate of soda, and the beauty of it is that the effects of this crop turned under on the soil remain for several years. Our soils need building up, and I want every man to plant a peck of vetch seed if it breaks you. Your going broke will have been for a glorious and a noble purpose—that of building up your soil, whereby you will be able to grow two blades of grass where only one grew before. Of course oats and rye are old familiar faces, and right now we are regretting that we did not sow more last fall.

Don't Forget the Weevil Poison
If 10 percent of your squares are punctured you should begin to poison the weevil, and we are anxious to show you the RIGHT WAY.

Marketing Campaign in Full Swing in Coffee.

This morning, Monday, we begin a drive to get our farmers enrolled in their co-operative marketing organization, and these men from Montgomery office of the Farm Bureau will spend the week in Coffee.

On account of the poultry specialists being busy just this time, we have put off the egg sign up for a few weeks. The egg pool will start in October instead of August as was first contemplated, and we will have plenty of time to get our quota by that time, and at the same time get the help and assistance of the poultry specialists that are now working in other counties.
